This file may not be redistributed in whole or significant part.

License Agreement

Upon purchasing any Transverse Styles product you acknowledge and agree to abide by the following:

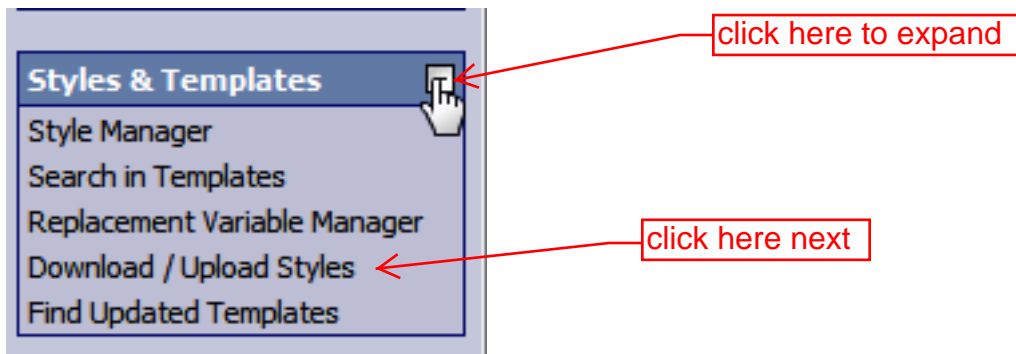

- Transverse Styles is a Christian based business and as such does not permit the use of our styles on any site with pornographic images, satanic or illegal content (such as illicit drugs or drug paraphernalia).
- Refunds will only be issued if the problem is style related or if we have been given a chance to fix the issue and we cannot make the repairs.
- Refunds will not be given due to style problems related to mods or hacks added to your site that interfere with the style.
- Exchanges will **NOT** be granted. Make sure **BEFORE** you finish your payment that you have ordered the correct item and that it is for the correct board software.
- Authorization from transversestyles.com to use any style you have purchased is strictly limited to one instance of application (i.e. strictly one domain on one server).
- You are permitted to alter the code and images of the style you have purchased. It is also acceptable to use the images on your actual website.
- Under no circumstances is the code of the style you have purchased (original or modified) permitted to be distributed to other parties.
- Exceptions will only be made with written permission from vbskinworks.com. All copyright notices must remain in the templates unless a branding free license is purchased.

-On breach of any of these clauses Transverse Styles will immediately revoke your license. Furthermore, no refund will be made on license fees.

How do I install the style?

Before you make changes to your board it is always a good idea to back up your database first.

1. Extract the zip files to a folder on your computer.
2. Upload the included image folder to your forums /images directory (ex: forum/images).
3. Login to your Admincp in your vBulletin forum and click on **Styles and Templates** to expand the menu.
- 4 . In the expanded menu click on **Download / Upload Styles**, a new page will load.

5. In the new page look for **Import Style XML File**. Click on browse and point it to the MT.lite or MT.dx.xml file that came with this style and import it following the diagram below. Repeat the process for the skin_name_fluid/fixed.xml file included in the package making sure to select the MT style you imported first as the "Parent Style".

A screenshot of the 'Import Style XML File' form in the vBulletin AdminCP. The form has several fields: a file path field with a 'Browse...' button, a dropdown menu for '(Create New Style)', radio buttons for 'Yes' and 'No', a text field, a dropdown menu for 'No Parent Style', a text field with '1', and radio buttons for 'Yes' and 'No'. At the bottom are 'Import' and 'Reset' buttons. A red arrow points to the 'Browse...' button with the text 'click here to import xml file'. Another red arrow points to the 'No Parent Style' dropdown menu with the text 'Select MT style as Parent'.

6. If you are using a vbulletin version older than 3.8 select **Ignore Style Version.**

Step 6 if needed

The screenshot shows the 'Import Style XML File' form. A red arrow points from the 'Step 6 if needed' text to the 'Ignore Style Version' radio button, which is currently set to 'No'. Another red arrow points from the 'Click here to complete installation' text to the 'Import' button at the bottom of the form.

Import Style XML File Help

EITHER upload the XML file from your computer

OR import the XML file from your server

Merge Into Style
(Selecting a style here will cause the imported style to be merged into an existing style, overwriting any conflicting entries. Leave blank to create a new style)

Ignore Style Version
Use style file **even** if it was created by a different version of vBulletin?

☐ Yes ☒ No

The following options apply only if you are creating a new style, rather than overwriting an existing style

Title for Uploaded Style
(Leave blank to use the style title specified in the style file)

Parent Style

Display Order

Allow User Selection ☒ Yes ☐ No

Click here to complete installation

7. Press **IMPORT** to complete the installation.

How do I change the Logo and Forum Title?

1. The logo of the skin is located in the images/misc folder.
2. You can use the included PSD's to modify the logo and buttons.

What about the fonts?

Due to copyright issues, fonts are not provided.
